First of all, the issue isn't abt stopping questions from being asked. Community process & protocol is that ppl from that community govern the confirmation process. Regardless of where in the country it is. Not ppl external. I can't speak for WA mob that's their business not mine

Secondly, in regards to Pascoe, whatever community he has identified with, if there are questions that community need to take it up with him. Not a person from outside. Which is what Professor Langton has stated.

Thirdly, identity fraud is common. This I agree with. And local communities have organised to address it. See the precedent set by mob in Dubbo a few years back.

Fourthly, my mob Yuin Ppl are currently dealing with a major issue of the fires. Priority atm is to rebuild & get on w/things. This identity issue is not going to go away. However misuse of Yuin voices thru screenshots by ppl most likely unaware they have been shared is unethical
